Summary

Results-driven Software Engineer with 3+ years of experience building and optimizing scalable software solutions. Proficient in **JavaScript, TypeScript, React.js, Node.js, OpenAI APIs**, and **RESTful APIs**. Strong background in **CI/CD pipeline implementation, SQL** and **MongoDB** optimization, and delivering end-to-end solutions across the **Software Development Life Cycle (SDLC)**. Experienced in working within **Agile teams**, resolving production issues, and ensuring reliable system support across critical timelines.

Experience

Konrad Jul 2025 - Present

Software Developer 2

- **Built an AI-powered document processing feature** using **OpenAI**, extracting structured data from PDFs via prompt engineering, and improving data digitization accuracy.
- Designed and optimized prompt logic for extracting key fields, achieving 90%+ extraction consistency and integrating results with **Cosmos DB** for scalable storage.
- Implemented subscription-based data handling across backend and frontend, enabling dynamic feature access based on plan tiers and improving product flexibility.
- Engineered a custom PDF preview and download system using React PDF, enabling seamless in-app document viewing from API binary data without relying on native browser viewers.
- Improved performance by implementing client-side caching for PDFs, **reducing redundant API calls by 50%+** and enhancing user experience for repeated access.
- Implemented secure authentication using **OAuth 2.0** with PKCE in a **Next.js SSR** application, aligning with modern auth standards alongside existing WSO2-based APIs.

Makse Group (Workday Partner)

Nov 2024 - Jul 2025

Full Stack Developer

- Developed and deployed **two full-stack HCM applications** using **Workday Extend**, each leveraging **Workday REST APIs, SOAP APIs, WQL**, and calling **third-party APIs** from within **orchestrations**, enhancing business workflows.
- **Proficient in building PMDs**, applying advanced logic using **WQL**, and developing **synchronous, asynchronous, and BP-triggered orchestrations** to automate and optimize complex business processes.
- Applying proficiency in **Workday Extend development, orchestration**, and application techniques gained through formal training and practical application.
- Deep understanding of **model components** and **PMD scripting**, enabling flexible and scalable application design in the **Workday environment**.
- Reduced manual effort by **99%** by integrating **IBAN validation** and auto-generating tasks through **Workday business processes** and **orchestration flows**.
- Delivered robust **Workday Extend solutions** by collaborating with cross-functional teams across all phases of the **Software Development Life Cycle (SDLC)**.
- Developed clean, maintainable code and implemented **unit and integration tests**, reducing post-deployment issues by **30%**.
- Provided ongoing **end-user support**, ensured smooth adoption of new Workday apps, and translated technical workflows into business-friendly solutions for non-technical stakeholders.

Hughes Systique Corporation

Jan 2023 - Nov 2024

Associate Software Engineer

- Created **30+ Node.js CRUD APIs** that communicate with **Postgres** database and **Google Cloud Services (GCS)** for dynamic software management and upgrades
- **Enhanced database performance up to 70%** by optimizing SQL queries, significantly reducing query execution time
- Developed a monitoring service for all deployed applications and Docker containers, effectively **managing resource usage, tracking critical stats**, and **ensuring optimal performance** and efficiency
- Implemented **CI/CD pipelines** using **GitHub** and **Docker**, enabling automated testing and consistent deployments across environments.
- Transformed Node.js applications into dependable **Linux services**, ensuring a **99.9% service uptime** for critical systems
- Achieved a remarkable **95% reduction in cognitive complexity** through code refactoring and architectural enhancements in **React.js**

Skills

Core/Languages

JavaScript, TypeScript, Python, HTML/CSS, SQL

Libraries & Frameworks

React.js, Node.js, Next.js, Gatsby, SASS, Bootstrap, Tailwind CSS, React Native, Open AI API

Databases

PostgreSQL, MySQL, MongoDB, WQL, RDBMS

Other Technical Skills

Git & GitHub, Docker, Figma, GraphQL, JSON & Rest APIs, MERN Stack, Headless CMSs, GCS, GCP, Problem Solving

Education

The Northcap University

July 2019 - June 2023

B-Tech (Computer Science)

DPSG

Undergraduate (Science)

April 2017 - March 2019
